

CENTROTIR LOGISTIC SERVICES is a logistics operator whose main activity is national and international road transport of both general merchandise and hazardous goods in approved containers. It also provides non-hazardous product storage services and other value-added services related to transport management.

Since its beginnings in 1988, CENTROTIR has based its activity on the principles of quality, prevention, respect for the environment, and safety in its operations. These strategic factors, aimed at maintaining a high level in the provision of services, have earned the trust of its customers and of society in general. Carrying out these high standards is possible primarily due to an extraordinary team of experts in the sector whose joint effort is the basis for achieving the objectives and goals proposed.

To achieve its goals, CENTROTIR promotes and emphasizes the following values:

- Dependability on all levels
- Agility in customer response and in effecting improvements
- Reliability in the fulfillment of commitments
- Pro-active environmental protection through the control and concern over waste produced by its activity.
- Innovation in the use of technology

CENTROTIR has developed an Integrated Quality and Environmental Management System to implement this policy and to guarantee the fulfillment of its objectives. Critical to the success of the execution of the policy is the fundamental cooperation of all members of the company. In addition, CENTROTIR is always open to the integration and implementation of other standards that may be required by its customers, whether they are regulatory or communication.

While the management of the company is oriented towards continuous improvement in all areas, it first and foremost takes into account the fulfillment of the requirements of its customers, and of society in general, as well as upholding its legal and regulatory obligations and its receptiveness to conditions that could arise in the future.
